**\*Dates are for setting out transplants**

<sup>1</sup> Dates are for Central Maryland. Advance or delay planting dates accordingly for other areas of the state.

<sup>2</sup> A good rule of thumb is to plant seeds to a depth 2x their diameter. Seeds can be planted deeper in sandy soils and shallower in heavy clay soils.

<sup>3</sup> Distance between rows can be reduced if rows are planted on a raised bed.

<sup>4</sup> Garlic planted in the fall will out produce garlic planted in the spring.
